

Urgent care visits in the comfort of your own home

Help is available for ailments and injuries

DispatchHealth professionals treat the same types of health issues that urgent care does. They also have special training in serious and complex injuries and illnesses, including COVID-19. When visiting your home, DispatchHealth professionals follow appropriate hygiene and safety protocols to help you stay healthy.

Common ailments

- Colds and flu
- Weakness
- Falls

Eye

- Injuries
- Skin infections around the eye

Helpful information

The care team

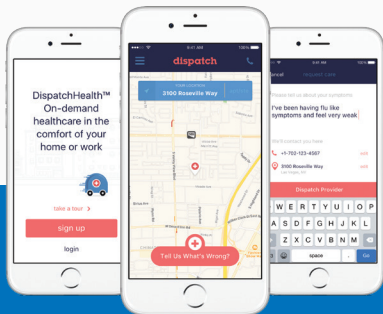

DispatchHealth provides you with experienced health care professionals who can evaluate different types of injuries and illnesses. You'll be seen by a physician assistant or nurse practitioner and a medical technician. A doctor with emergency room experience is available virtually. DispatchHealth will call in necessary prescriptions and update your doctor.

Payment

DispatchHealth bills your insurance directly, but you can pay your share of the cost with a credit card, health savings account (HSA), health reimbursement account (HRA), or flexible spending account (FSA).

Care that fits today's world

In these challenging times, DispatchHealth brings care to your home that's convenient and safe, and costs less than a visit to the ER.

In a life-threatening emergency, call 911 immediately.

If your plan doesn't have an urgent care copay, the most you would ever pay for this provider is \$275.
